Experience & Training

Centre for Electronic Governance (CEG), Jaipur

Jun 2025 – Jul 2025

Android App Development Intern (Flutter)

- Developed Android applications using Flutter and Dart during the summer internship program.
- Implemented mobile UI components and application logic for cross-platform mobile development.
- Gained hands on experience in mobile app architecture and development workflows.

MNIT Innovation and Incubation Centre (MIIC), MNIT Jaipur

Jul 2024

Industrial Trainee – Machine Learning and IoT

- Completed industrial training on Basics of Machine Learning and IoT with a startup incubated at MIIC.
- Learned fundamental concepts of machine learning models and IoT system integration.
- Explored practical applications of ML and IoT in real-world problem solving.

Technical Skills

Programming: Python, Dart, C++

Frameworks & libraries: Flutter, Firebase, Scikit-learn, numpy, pandas, matplotlib

Tools & Technologies: Git, Jupyter Notebook, VS Code, Android Studio

Soft Skills: Analytical Thinking, Problem Solving, Creativity

Projects

ML Mule Account Detection System

GitHub

- Built an end-to-end ML pipeline to detect money laundering mule accounts on a 16.2 GB dataset with 400M+ transactions.
- Engineered 180+ fraud-detection features across 13 financial crime patterns using memory-optimized batch processing.
- Improved model robustness using label-noise detection and trained a LightGBM + XGBoost ensemble achieving 0.983 AUC.
- Developed a temporal window algorithm to identify suspicious activity periods for flagged accounts.

Samwaad AI – AI-Powered Meeting Intelligence Platform

GitHub

- Developed an AI meeting intelligence platform for real-time transcription, summarization, sentiment analysis, and action-item extraction.
- Integrated Google Speech-to-Text and Gemini AI for diarization, meeting insights, chaptering, and decision tracking.
- Automated workflows with Google Calendar, SendGrid, and CRM logging based on AI-detected tasks.
- Built a scalable FastAPI backend using WebSockets, Redis, PostgreSQL, SQLAlchemy, and JWT authentication.

Smart Budget Tracker APP

GitHub

- Developed a cross-platform personal finance management application using Flutter and Dart.
- Implemented expense tracking, monthly budget management, and interactive spending visualization using pie charts.
- Built an AI-powered budgeting assistant to provide personalized financial insights and savings suggestions.
- Integrated CSV export functionality and designed a modern, responsive, dark-themed UI.

Education

Government Engineering College, Jaipur

2023 – 2027

B.Tech in Computer Science and Engineering

CGPA: 8.99 (as of 5th semester)

Certifications

- **Machine Learning Specialization** – Stanford Online, DeepLearning.AI (Andrew Ng)
- **Neural Networks and Deep Learning** – DeepLearning.AI, Coursera
- **Python for Data Visualization** – LinkedIn Learning
- **Programming in Modern C++** – NPTEL (IIT Kharagpur)

Achievements

- **National Hackathon Recognition:** Secured **5th Rank** in a national-level competition at MNIT Jaipur Sphinx'25.
- **Technical Innovation & Prototyping:** Awarded a **Certificate of Appreciation** at MUJ HackX 3.0
- **National Fraud Prevention Challenge (NFPC):** Awarded a **Certificate of Appreciation** at a national level hackathon focused on AI-driven financial fraud detection and prevention solutions.
